

The Trend of Authentication

Something you know
Something you have
+ Something you are!

AUTHTREND

FIDO U2F

There are more than 50% users leveraging Facebook and around 50% users leverage Google to login online service; enable U2F with ATKey to secure your login.

Identity and SSO

Through ATKey and AT.Server to enable Multi-factor authentication (MFA) with SSO experience and also easy for administration.

Banking & Government

Alliance with FIDO/PKI service provider, ATKey can generate FIDO key and CA for banking or Government as identification services.

Enterprise & Organization

We provide both client and server SDK by demands to integrate ATKey into existing SSO solution with biometrics enabled identification and authentication.
